

Electrical Design and Contracting

Alternative Solutions

//

We have a young, dynamic and experienced core staff that understands you better and adds value to your thoughts.

Who we are?

Latek Electric

Latek is formed of experienced engineers that, in critical applications that require engineering and technology know-how, has managed to execute Turkey's and the world's most extensive and complex projects. Latek has aimed guide the future with its research and designs by utilising new technologies in its engineering services. Latek is becoming a Client oriented company that provides latest technology with its solutions and services.

Design

Our firm has been executing Ultra Low Voltage Systems, Medium Voltage and Low Voltage Systems design services in accordance with Turkish regulations and international standards in coordination with the clients.

Contracting

We have been serving you, our esteemed clients, with our expert electrical contracting staff in national and international projects with estimations, design, tender, field productions, installation, test and commissioning activities.

Consultancy

We provide expert services, consultancy services, high voltage operations responsibility, earthing survey services, systems monitoring and reporting via thermal camera, operations and maintenance guide preparation as per Project requirements, maintenance and control of building electrical installations as per safety laws and regulations.

Mission

Our mission is to be a Client oriented company that provides latest technology with its solutions and services.

Vision

Our vision is to become an institutionalized company which aims to give direction to the future while focusing on development, research, and design.

Quality Policy

Is to be a company that is, progress oriented, directing the future with research and design, institutionalized, customer oriented and providing the latest technology and solutions with its services.

Occupational Health and Safety

Latek, has aimed to achieve occupational health and safety, as part of the ISO 45001:2018 Occupational Health and Safety Management System. Therefore, all construction site employees are trained about the possible risks and precautions to protect them at the start of a new Project and afterwards they get daily regular training. The importance of personal protective equipment, correct and effective use of them and how to reduce the possible risks in the working environment are covered in the trainings.

ISO 9001	ISO 14001	ISO 45001
QUALITY ASSURANCE	ENVIRONMENTAL MANAGEMENT	SAFETY CERTIFICATION

Services

Electrical Installation Plans

LV-MV power installations, lighting installations, auxiliary power, reactive power compensation installation, ultra low voltage installations, safety installations, earthing and lightning protection installations and automation system work plans are prepared as per the following main titles.

- Survey and recommendation report
- Pre-design
- Final design
- Shop drawing

Contracting, Design, Operations, Consultancy and Control

We have been serving various governmental and private institutions with our experienced engineering staff on contracting, design, operation, consultancy and control challenges they undertake.

Fields of Activity

Industrial Sites Commercial Centers Factories
Education Complexes Warehouses
Touristic Complexes Construction Sites Multi Stores Car Parks

Airports
Sport Halls
Ports / Hotels
Cafe & Restaurants Wastewater Purifiers University
Campuses Hospitals Residence and Shopping Mall

While We are Working

We are able to work as per all requested local and international standards and regulations (NEC, NFPA, EN, IEC, SNIP, GOST, BS etc.)

We are able to do all technical and efficiency calculations such as short circuit, voltage drop and lighting calculations.

We are able to provide design services in conformance with LEED and BREEAM standards that have been widely practiced after Kyoto Protocol in order to decrease the carbondioxide emissions.

We can also support project management practices with our staff that are experienced in MS Project, Primavera and ERP Project Management software by supplying appropriate data regularly.
